

We can c.n.c prepare for letter plates, handles, multi-point locks, rim locks, mortice locks, dead locks, stable doors and much more.

Solidor
Leading the way in high quality composite doors

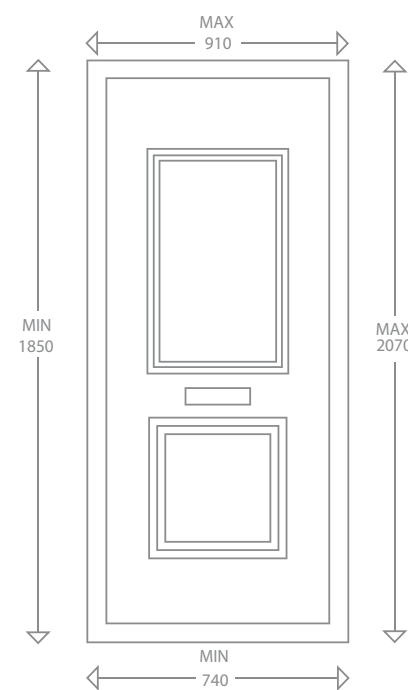

We can supply you with our specially designed composite door hinge. This makes hanging your slab quicker and easier than with traditional butt hinges.

All designs, colours and styles are available as stable doors. These come complete with a stable door accessory kit for easy assembly.

Specification

- Prepped to your requirements
- Slab thickness 48mm
- Solid timber core
- 3-5 working day delivery
- 10 year warrantee
- Made In England

The Solidor Slab Only Collection
Edition 1

Solidor specialise in high quality, 48mm solid timber core composite door slabs

The Solidor collection is an outstanding range of solid laminate 48mm timber core composite door slabs.

These exclusive slabs are 48mm so they are easily hung into most PVCu profiles, often there is no need to stock a secondary outer frame along with its accompanying reinforcing etc. The slab fits easily into many of the PVCu profiles on the market.

At Solidor we can supply you with all your slab only requirements, from the slab to the cassettes, the hinges and locks, the list is endless.

The entire Solidor range is available c.n.c prepped to your exact lock and glazing requirements, available in any colour, any side, ready to hang into your outer frame, delivered in just 3-5 working days.

Both the inner and outer faces of a Solidor slab are available in any of our 7 colours including foiled Rosewood and Sherwood Oak, ensuring an exact match to PVCu outerframe foils.

All doors are sized, cut for glazing apertures, lock and handle prepped on our own c.n.c machine centres at no extra cost.

All Solidor slabs are edge banded in our factory at no extra cost!

We only use the finest quality, through colour, thermo plastic skins to give you and your customers the ultimate zero maintenance composite door.

We don't charge extra for colours whether its a red, blue, green, white or black slab!

You can have red on red, blue on black, green on rosewood.....etc, you can have what ever combination you require.

We manufacture all our slabs from scratch in Staffordshire in an ISO 9001 environment. Each Solidor slab undergoes a strict quality trail before it is pressed and again before it is despatched. This ensures that each and every one of our customers gets the high quality product that they expect.

Solidor truly gives a feel of quality, due to its solid timber core.
